Career Summary

Analytical and adaptable Mathematical Science graduate currently developing within Corporate and Investment Banking, with experience supporting regulatory reporting, SARB returns, and correspondent banking processes. Strong foundation in quantitative reasoning, structured problem solving, and analytical thinking, complemented by exposure to data-driven technologies and business operations.

Passionate about leveraging data, technology, and innovation to solve business challenges, with growing expertise in Python and an interest in data analytics, data engineering, software development, and financial systems. Recognized for attention to detail, curiosity, adaptability, and a continuous learning mindset.

Experience

- **Rand Merchant Bank – Sandton, South Africa**

OpsXperience Graduate Programme | Jan 2026 – Present

Placed in the Client Desirability Risk Management (CDRM) team, gaining exposure to risk assessment, regulatory compliance, and operational processes within corporate and investment banking.

- **Project Y – Sandton, South Africa**

Digital Engineering Associate | Oct 2025 – Dec 2025

Participated in a hands-on, project-based program covering AI engineering, Low-code programming, Data engineering and Cloud engineering.

Education

University of Limpopo — Limpopo, South Africa

Bachelor of Science in Mathematical Science | Nov 2024

Key Modules: Advanced Calculus, Linear Algebra, Applied Regression, Database Systems, AI and Programming

Springs Boys' High School — Springs, South Africa

National Senior Certificate | 2018

Subjects: English, Afrikaans FAL, Mathematics, Life Orientation, Geography, Life and Physical Sciences

Highlighted Projects

Codebreaker | Project Y, 2025

- Developed an AI-powered coding assistant that helps generate code snippets, explain programming concepts and solve any problems.
- Deployed it
- Collaborated with team members using GitHub for version control and project management.

Movie Buff | Project Y, 2025

- Built a movie recommendation system using external API and AI algorithms.
- Designed logic to filter and rank recommendations based on user preferences.
- Coordinated code integration and testing with teammates

ETL Data Lifecycle | Project Y, 2025

- Executed end-to-end ETL process: data cleaning, transformation, loading to cloud storage, and visualization.
- Wrote SQL queries for data extraction and analysis.
- Managed deployment and collaboration using GitHub, following version control best practices.

Expenditure Analysis Project | University of Limpopo, 2024

- Conducted an in-depth statistical analysis of student expenditure trends using SPSS and SAS.
- Designed and implemented a survey engaging 130 final-year students.
- Delivered a compelling presentation to faculty, highlighting actionable insights into student spending.

Accommodation Platform Development | University of Limpopo, 2023

- Collaborated with peers to design a user-friendly web and mobile app connecting students to housing.
- Enabled filter-based searching and profile creation for accommodation providers.
- Enhanced usability and accessibility for over 1000 potential users within the campus community.
-

Leadership & Team Management

Limpopo Hockey Provincial Team Manager – U18B (2023) and U16A (2024)

- Led all travel, accommodation, and scheduling logistics for regional teams.
- Strengthened coordination between coaches, players, parents, and tournament officials.
- Built resilience and clarity in high-stakes environments through proactive planning.

Technical & Professional Skills

- Programming Languages: Python, C++, SQL, HTML, CSS, JavaScript
- Tools & Technologies: SPSS, SAS, Microsoft Excel, Git
- Core Competencies: Data Analysis, Statistical Modelling, Data Visualization, Web Development
- Soft Skills: Leadership, Teamwork, Analytical Thinking, Clear Communication
